

BOSTON MORNING POST.

PUBLISHED DAILY, AT NO. 21 WATER STREET, BY BEALS & GREENE.—CHARLES GORDON GREENE EDITOR.

VOLUME XIII. NO. 16.

TUESDAY

MORNING, JUNE 20, 1837.

PRICE \$6

PER ANN. IN ADVANCE

16

MANHATTAN HOUSE.

NO. 68 DUANE-STREET, NEW YORK.
JAMES RYAN, from the Howard House, Boston, recently informs the public, that he has taken the large building in Duane street, 6 stories from the ground, as Rutgers College, for the purpose of a HOTEL AND RESTAURANT. The exterior of the building has been entirely taken out, and refitted expressly to suit the business of the present occupation.

Mr Ryan will keep the Manhattan House for the accommodation of Clubs and Parties. The best wines and liquors will be furnished from his cellar, having been carefully selected from the best stocks in Boston, a large portion of them being of the celebrated stocks long in the cellar of Mr Gallagher, late of the Exchange Coffee House. Rooms will be furnished for References and Courts Martial. Transient and permanent boarders will be accommodated in the best style known in the country; and elegant apartments will be let, with or without board.

The Hotel will be supplied with every delicacy of the various seasons. Breakfasts, Dinners and Suppers, of every description, will be served at short notice, and various Soups will be ready every day from eleven to three. Mr Ryan is as confident that in this department, his own experience, added to the skill of the persons employed as *cuisiniers*, will enable him to please the most fastidious epicures, both in respect to quality and style.

Those friends who have known the character of Mr Ryan's House in Boston, is he assured, will find his accommodations, his means more ample, and his dillgence quite as untiring; and from such strangers in this city, as love excellence in the various departments of his profession, he would beg the favor of an early call, with the full hope of giving satisfaction.

The House was opened on the 15th June, 1837. epif je17

YEOMAN HOUSE,

No 24 Ann st, head of Merchants' Row, Boston.
The subscriber having bought out Mr Levi Mower, of the above house, has now opened the same for the reception of company.

This House is situated in the most central and business part of the city, is handsomely fitted up for the accommodation of gentlemen, who can be furnished with room and board, and board without rooms on the most reasonable terms.

Gentlemen visiting the city on business are respectfully invited to call.

The bar will be furnished with choice liquors of all kinds.

The subscriber will render every exertion and attention to make this House worthy the patronage of his friends and the public, of whom he solicits a share.

f 22 JOHN TILTON.

WORCESTER HOUSE.

The subscriber has taken the Worcester House, situated on Main street, directly opposite to the Depot of the Boston and Worcester Railroad.

The establishment contains a great number of public and private parlors, and a reading room—furnished throughout in elegant style, and provided with every accommodation for travellers, families and parties.

Menus will be furnished for passengers arriving or departing by the Cars or Stages.

All Stage coaches leave Worcester, call at the House for passengers.

The prices have been greatly reduced, and are now put at the most moderate rate.

N. B.—Stabling and keeping for horses will be furnished.

LYSANDER C. CLARK,
Worcester, June 7, 1837.

WASHINGTON HOUSE.

No. 4 Washington-street, Newbury, Mass.

A. BULLARD has taken the above establishment, with the intention of keeping a first rate House of Entertainment, for the accommodation of strangers and others, who visit the Island. From the experience he has had in this line of business he flatters himself that he can give entire satisfaction to those who may honor him with their patronage—a portion of which he respectfully solicits. He will accommodate steady Boarders, on the most reasonable terms.

COLLECTOR'S OFFICE.

Boston, June 14, 1837. 3

DROPPOSALS will be received at this Office until the twenty-first day of June, for building a Light House and Dwelling at Federal Point, in North Carolina, of the following materials, dimensions and description: The tower to be built of hard brick, the base round; the foundation to be square, three feet deep, as may be necessary to make the tower secure, to be laid in good lime mortar. The height of the tower to be thirty feet above the top of the base, and the diameter of the base to be eighteen feet and that of the top nine feet. The thickness of the wall at the base to be three feet, and to be uniformly graduated to twenty inches at the top. The top to be arched, on which is to be laid a deck of soap stone eleven feet in diameter, four inches thick, the joints filled in with lead, on one side of which is to be a scuttle to enter the lantern, the scuttles door iron framed covered with copper; the outside wall to be well plastered with Roman cement, and whitewashed twice over. There are to be two windows, twelve lights each, of ten by eight glass, in strong frames, and six feet apart. The door made of double iron boards, cross noded, with substantial hinges, lock and latch, the door posts, cap and stool, to be of dressed stone, at least ten inches square—the ground floor to be either paved with brick or stone—a sufficient number of circular stairs to lead from the ground floor to within six feet of the lantern, connected by a centre post, guarded by a good hand railing, with good floors on the joist of each story. From the top of the stairs to the entrance of the scuttle to be an iron ladder with steps two inches square.

On the top of the tower to be a wrought iron lantern, of the octagon form, the posts to be one and a half inches square, to descend down into the six work five feet, and secured with a screw. The width and diameter of the lantern to be sufficient to admit an iron sash in each octagon, to contain eighteen lights, eleven by nine glass, the lower tier to be filled with copper, the rabets of the sashes to be three quarters of an inch deep, and glazed with the best double glass from the Boston manufactory. In one of the octagons to be an iron frame covered with copper, four feet by two, to shun into the rabets, with two strong turned buttons. The top of the dome, formed by sixteen iron rafters, concentrating in an iron hoop, four inches wide and nine inches in diameter, which is to come down and rest on the piece that forms the top of the lantern, to be secured with a copious quantity of copper wire, three feet long and twenty inches wide around the lantern to be an iron ring, the posts of which to be cut and a quarter inches square, the upper one to be four feet from the deck. The lantern and wood work of the tower to be painted twice over with white lead, except the dome, which is to be black.

The Light House to have one complete electrical conductor, made of copper, three quarters of an inch in diameter with a fine and robust insulation. The outer shell to be of polished brass, the windows, of glass, and the door—of wood. The door to be of iron, with a brass handle, and the door posts, cap and stool, to be of dressed stone, at least ten inches square, the lower one to be four feet long and fifteen inches in diameter, on which is to be secured a copo vane, three feet long and twenty inches wide around the lantern to be an iron ring, the posts of which to be cut and a quarter inches square, the upper one to be four feet from the deck. The lantern and wood work of the tower to be painted twice over with white lead, except the dome, which is to be black.

we can only say that they can no more be indulged than a spoiled child who would gladly bankrupt the "old man" for the sake of a frolic.

Suppose Congress pass a law to receive failed bank notes in payment for dues to the Treasury, shall all such notes be received, or shall a distinction be set up? If all be received, would not such a law operate as a bribe to the Banks to extend their issues, and would not every honest banker have ground to complain of the tendency of the law, so long as he makes his paper more valuable than that of other cities?

Boston bankers are doubtless better able to keep their paper in credit than many at the south and west, and it does not become them as wise and honorable men, to sanction a system to wrong the government or any others, especially when it could not fail to fall the heaviest, ultimately, upon those most unable to bear it. But suppose the citizens of any one interest could be so unwise and powerful as to force Congress into the mad project of receiving failed Bank notes for money at the Custom House for their face, would other citizens be satisfied with it, unless public land could be purchased with paper also? If not, you would soon hear something more than murmurs about particular laws—legislating for the rich, &c.

Well, suppose a law be passed to receive such paper at the Land Office, and then you encourage banks to buy up all the national domain at their own price; and with such an inducement what bank would be honest? The present legal way is the only one which could be devised when men were calm and uninfluenced by personal or party feelings, and it seems to us, that any attempts to uproot a species basis, is unqualified madness, and those who have any thing to lose, either of conscience or property, must set their faces in favor of the supremacy of the law.

HALF EAGLE.

There has been a great deal said lately about the arrest of several individuals by Watchman Pierce, and their commitment by Mr. Babbitt. It is very easy to raise an excitement against the Watch, for most young larks, and not a few old ones, have reason to remember their rattle and their hooks; and in reading the testimony against them it should be remembered that the witnesses are generally those whose prejudices and feelings are strongly opposed to the "Charlies." The Watchman, too, travels alone—the "rowdies" go in herds—therefore, the former stands but a poor chance in testifying against the latter, as by the mouth of two or three witnesses are all things established. It is not surprising that Mr. Pierce did not relish being told what were his duties by those who had no authority to instruct him upon this point, or that he should become irritated by an attempt to intimidate him, or at a reproof for an alleged neglect of his obligations. We do not, by any means, think that Mr. Pierce pursued a judicious and proper course—but we think his conduct does not merit the full measure of censure it has received from many quarters, and that it admits of strong palliation. Mr. Babbitt we know personally, (not officially, we beg the reader to understand,) and have always found him to be an upright man in all his dealings, and believe the report that he has committed men without an investigation into the misdemeanors charged upon them, is incorrect.

The duties of the Watch are frequently very onerous—an immense responsibility rests upon them, and they are often obliged to discharge that responsibility at great personal hazard—therefore, the public should be cautious in judging of their conduct, and see that full justice is done to it, that those who are faithful may rely with confidence in the day time, upon the protection of those whom they guard in the night.

In another column will be found the "Regulations for the enlistment and employment of boys, who may be entered to serve in the Navy until they arrive at the age of twenty-one years." It will be perceived, by a perusal of them, that provision is made for the encouragement and advancement of those who may give evidence of talent and conduct deserving the attention of the government, and that facilities will be afforded them for their instruction, &c. These Regulations are wise and liberal, and open the way for obscure and friendless lads to reach the highest honors in the service.

The Naval Rendezvous is now open at the corner of Clinton and Commercial streets, for the shipment of men and boys.

We have received a great variety of communications relative to the Sunday Riot, but, as we have taken pains to publish all the facts which were elicited upon the legal investigation of the subject, we think that is enough for the present, and that the further discussion of the affair, until those who are bound over have had their trial, would be improper. The one which concludes—"You know my motive if the language does not convey it," was written by some ignoramus who had better learn how to spell Veteran before he undertakes to blow us up.

We have received a long communication dated at Hanover, N. H., which gives a minute account of the visit of a negro girl at that place, in company with her brother, and the attentions she received from certain abolition students—one waited upon her to the College Library, &c., but as it is anonymous, and from certain other evidence, we suspect it was intended as a hoax.

Our neighbor of the Times gives notice that he intends to establish a Post office on his own hook—he thinks that there is business enough for two in this large city; although a little fellow he is spunky, and determined to make whigging sing small.

"A looker on in Venice," and not "a looker on in Vienna," is the true reading of the text.—Noah.

The correction is worse than the error, and not so near the "text"—try again Major.

"Half Eagle" must excuse us for the delay in publishing his communication. It was suspended at the time of its reception, and has just been recovered.

Correspondent wrote us some days since that he had discovered a bed of oysters near South Boston Bridge by their phosphorescence. He believes in Gardner.

The Bills of the following Banks are not received at the Suffolk Bank.

MUNICIPAL COURT.

Trial of Benjamin Winslow and George B. Stearns, for an Alleged Conspiracy to get possession of certain Negotiable Notes—Counsel for the State, S. D. Parker, Esq.—for Winslow, Richard Fletcher, Esq.—Pelegrine Sprague and W. J. Fletcher, Esq., for Mr. Stearns.

The office of Governor is the most honorable in the gift of the people of this State. Having been re-elected to that office without a contest and by a generous vote, permit me, Gentlemen, to tender through you to the great body of Freemen of New Hampshire, my high sense of gratitude for the repeated expression of their confidence. Coming from that intelligent mass of citizens, many of whom have been personally acquainted with my course for the last quarter of a century, I value the compliment more than I should any other appointment from any other source under heaven. Relying on that generosity which has ever given me credit for good intentions in all my public acts, and in the absence of much of high political excitement which has existed in some other States, the duties of Chief Magistrate in this State during the year which has just expired, have been discharged with comparative ease. There has been little contest for place before the appointing power, and no want of unanimity in the decisions of the gentlemen who have been associated with me in the Executive Board. In the hope that this unanimity may continue through the ensuing political year, I now take and subscribe the usual oaths of office.

Mr. Editor—Have the goodness to inform me what has elicited such encomiums upon the wonderful services performed by the New England Guards, under Ensign Bigelow, at the Broad street riot? I am personally acquainted with many members of that company, and know they will be received as false, and not entirely merited. They charged, and dispersed the mob, but so small a company could not keep them from closing in on their rear—their's was but a small part in keeping the streets clear. The New England Guards happening to have the only commissioned officer on the ground, of course were entitled to the precedence and to the charge, in which they were efficient, and performed their duty like good soldiers, as they are. I mete to them all credit due, without jealousy and with pleasure, the more so, as they were led on by an officer, who, I am told, was but a two days old soldier. I sincerely congratulate them upon their happy choice. I have seen poorer officers, of years standing, and few more prompt, or who seemed to understand their business better.

I must now, as one who performed active service that day, and who cleared as many people from the streets and sidewalks as any other single soldier, claim a little desert, and at the same time would say, I did no more than every other member of the Boston Light Infantry.

The Boston Light Infantry know their duty and stand ever ready to do it, without putting on the head for a good fellow.

PRIVATE TIGER.

It has been remarked that violins cannot be produced in this country equal to those of foreign manufacture—but where, with some pride it may be asked, has American genius failed in any department of the arts, to accomplish whatever it has willed?

Mr. Ira White, a very ingenious young man, and one of our best musicians, has, at his leisure moments, already manufactured several violins, some of which have proved to be of the first order. He has just completed one, which, as a specimen of beautiful workmanship, and as possessing all the requisites of a first rate instrument, such as depth, soundness, brilliancy of tone, &c. we have in view.

GRAND BALLOON ASCENSION.—L. A. LAUER respectfully announces to his scientific friends, and the public generally, that he will make his first Grand Ascension this season, from Taft's Garden, Chelsea, on TUESDAY, June 20th, 1837, (the anniversary of the Battle of Bunker Hill, 1775.)

The Amphitheatre, for the reception of the public on this occasion, is pronounced substantial, affording to the most distant spectator in the arena, a full and satisfactory view of the whole process of inflation.

As an enhancement whatever can retard the anticipated flight (weather permitting) Mr. L. flatters himself that the judicious arrangements already completed will ensure public confidence.

The Gates of the Garden will be thrown open at 1 o'clock P.M., the process of inflation to commence at half past 2 o'clock.

Tickets, 50 cents each, to be had at Mr. Taft's, and at the office in Chelsea. je20

CONCERT HALL.

WILL open on TUESDAY EVENING, June 20th.—HARRINGTON'S unrivaled Entertainments, consisting of VENERABLY—new, and astonishing experiments in NATURAL MAGIC—the celebrated Automaton Fortune Teller. To conclude with the highly popular Panoramic Spectacle of the

CONFAGRATION OF MOSCOW, with additions and improvements forming the most magnificent and correct representation of this event, ever presented to the public.

Doors open at 7 o'clock. Exhibition commences at 8 o'clock every evening. (Saturday and Sunday excepted.)

Tickets, 50 cents. Children under 12 years of age half price. To be had at the box office on the day and evening of performance,—also at the principal Hotels.

SATURDAY AFTERNOON EXHIBITION.—An exhibition will be given every SATURDAY AFTERNOON at 3 o'clock, for the accommodation of Junior branches of families, 17.

THE MAGNIFICENT PANORAMAS OF JERUSALEM AND NIAGARA FALLS, at the new Building, Charles Street, near the Providence Rail Road Depot. These splendid Pictures will be exhibited at the Pavilion, commencing on Saturday May 22nd, and will be open every day, Sundays excepted, from 8 o'clock in the morning until 8 o'clock at night.

The Panorama of Jerusalem, is one of the largest, and finest pictures of its kind in the world, and covers a surface of 10,000 square feet. The artist made a journey to the Holy City in the year 1834, for the express purpose of making the drawings. Its accuracy may be relied upon, and it is universally acknowledged to be a very superior painting.

The Panorama of Niagara gives a correct representation of those celebrated Falls, and is also a painting of superior merit.

Admittance, 25 cents to each Picture. Season ticket, not transferable, admitting to both pictures, \$1. my26 episit

D.R. HARRINGTON'S SURE PREVENTIVE OF GONORRHOEA AND SYPHILIS.

"An ounce of Prevention is worth a pound of Remedy."

THE long sought for desideratum lies no longer in total obscurity. Doctor Reuben Harrington has discovered by a chemical process, a most valuable preventive of that awful scourge so mankind, the Gonorrhœa and Syphilis. The above medicine is now in full use, and sold where, but by the inventor, No. 59 East State, Boston. Name—Dr. Reuben Harrington, who is a graduate of the Medical Faculty of Harvard University, and has been a member of the Zoological Institute, nearly opposite the Baptist church, also for sale at several apothecaries in the city and country. Price \$1.25 with the pills.

CERTIFICATES.

March 12, 1856.

I was afflicted six years with Dispepsia. No physicians nor medicines gave me relief—I suffered much, and as reduced very low—a friend recommended to me the Jelly of Pomegranate. I bought two bottles, and used one and two thirds of another, and am entirely cured—it is now six months since, and have had no ill turn.

HANNAH LITCHFIELD.

Colchester, March 13, 1856. My child, a girl six years old, was afflicted with a humor ever since two years of age, and I began to be very troublesome, principally on the head and face. I bought the Jelly of Pomegranate and Salt Rheum Ointment, prepared by Dr Gordak, used it according to his directions, and in one week my child was cured—it is now six months since, and no humor has appeared again.

W.M. BROWN.

Boston, Nov. 12, 1856. Two months before I applied to Dr Gordak, was taken with a cough, attended with a dull headache—the cough kept growing worse—a shortness of breath appeared, and I kept losing flesh very fast—in short it was alarming. I applied to Dr Gordak—he gave me two kinds of medicine—the Jelly of Pomegranate, and Pulmonary Jelly—I took the medicine according to his directions, and received immediate relief—in the course of 14 days I was entirely cured.

ELIZABETH L. MERRITT.

Boston, July 4, 1856. Dr Gordak, Sir: I cannot help acknowledging my gratitude to you for the cure I received, in the use of your Jelly of Pomegranate and Pills. My disease was a universal weakness—I was so low that I was unable to walk out of the house, and continued to grow weaker every day. I used your Jelly of Pomegranate and Salt Rheum Pills with astonishing success—in five or six days I was entirely cured, and ever since have been free of canker. I really think there is no medicine for canker equal to the Jelly of Pomegranate.

CHARLES HARLOW.

MARBLE CHIMNEY PIECES, &c.—Marble Chimney Pieces, Monuments, Tombstones, Table and Counter Tops. The largest assortment to be found in New England. For sale by the Subscriber at the corner of Cambridge and Charles streets. JOHN TEMPLETON.

MUSICAL NOTICE.—THE BOSTON BRASS BAND respectfully informs their friends and patrons of Boston and vicinity, that their ranks are now increased members, their new uniform full and complete. A variety of popular Music is now added to their approved selections and will be brought out the earliest opportunity. No pains will be spared to render this Association as respectable as possible, and every opportunity will be given to those who have been bestow'd on the instrument of their choice.

SCOTT'S PATENT ASBESTOS CHESTS.

Washington, March 2, 1857.—Mr Scott fully tested, on Tuesday, in the yard of his hotel, the power of his Asbestos Fire Proof Chests, by placing them over a fire until they were in a large fire, which gives the iron chest "the water."

The experiment upon the chests was tried at Washington in March last, we will be seen in the following extracts.

From the U. S. Gazette, March 1, 1857.

Among other doings at Washington, we notice that Mr Scott, of this city, has sent his representatives of the people the use of his Safety Iron Chests, by "Water," but does not know the powers contained in the chest."

From the National Intelligencer.

The experiment upon the chests was tried at Washington in March last, we will be seen in the following extracts.

From the U. S. Gazette, March 1, 1857.

Among other doings at Washington, we notice that Mr Scott, of this city, has sent his representatives of the people the use of his Safety Iron Chests, by "Water," but does not know the powers contained in the chest."

From the National Intelligencer.

SCOTT'S PATENT ASBESTOS CHESTS.

Washington, March 2, 1857.—Mr Scott fully tested, on Tuesday, in the yard of his hotel, the power of his Asbestos Fire Proof Chests, by placing them over a fire until they were in a large fire, which gives the iron chest "the water."
